

# **With The Grain Professional Hardwood Flooring Tips**

**We have prepared a quick guide to help you prepare for your flooring project. Using this guide will help you to prepare and understand what to expect when doing a renovation in your home, and will help getting back to living in your home.**

**For a site finished install**

**Before the flooring crew arrives:**

- **Plan for away play time for your pets. Our machines are loud and could be stressful for your pets.**
- **Remove your plants from the sanding area.**
- **Remove pictures off the walls. While we do plastic off walls and fixtures and use a vacuum system to help contain dust, fine sawdust will hang around.**
- **We can help move large furniture pieces to another area, if you would like us to. Curio cabinets with collectible and fragile pieces will have to be emptied. Please note that we do not unhook or move electronics. We will move your tv if it is unhooked.**
- **If a kitchen is in your renovation plan, clear off all the counters, and remove anything off the floors (pet dishes, trash cans, etc.)**
- **We will remove & replace your refrigerator & electric stove. We cannot do gas stoves. We recommend you arrange for a licensed plumber to come in and unhook your stove before we arrive.**
- **We can recommend a cleaning service if you would like.**
